

Cybersecurity, IT Assurance & Governance Virtual Conference 2022

Accelerate Digital Transformation
9th - 11th August 2022
 Start at 09:00 AM to 14:00 PM

Supporting Organisations

ISACA Malaysia is excited to announce the return of its virtual Cybersecurity, IT Assurance and Governance (CIAG) Conference! As witnessed and experienced by many last year, the virtual conference has allowed us to bring in subject matter experts beyond our shores, and we strive to do the same this year. We are privileged to have ISACA's Global Chief Membership & Marketing Officer, Julia Kanouse, joining us to kick start the 3 days event, followed by a series of sharing sessions by some of the most esteemed speakers locally as well as outside of Malaysia.

Rapid advances in technology and the emergence of new digital solutions have accelerated the digital transformation agenda. Many organizations are starting to feel the pressure to take advantage of digital opportunities or risk losing out in competition. Along with this comes rising concerns on the risk of technology and digital adoption - security, privacy and technology resiliency are just amongst the few. This CIAG Virtual Conference will feature many points of views presented by our esteemed subject matter experts in various plenaries, panels and masterclasses. The main conference on 9th and 10th of August will feature keynote address, plenary and panel discussion sessions, while 11th August conference day will be split into concurrent management and technical masterclasses covering the latest development on cybersecurity, IT governance, business continuity management and assurance, in the context of digital transformation. These classes are designed to provide 'live' practical experiences and thoughts sharing by the speakers.

This year's CIAG will be fully electronic - in addition to the online program presentation, conference delegates can leverage on the conference virtual platform to stay in tune with the plenary speakers, conference schedules and provide feedback as well as accessing the presentation and sponsors materials. For full CIAG2022 details, visit www.isaca.org.my.

Virtual Conference Day 1: 9th August 2022

0900 – 0910

Opening Remarks by Organizing Chairperson – Jasmine Goh

0910 – 0950

Keynote: In Pursuit of Digital Trust

Julia Kanouse

Chief Membership & Marketing Officer, ISACA

As organization's transform their business processes and customer experiences to better leverage digital technologies, they introduce new complexities and risks. No digital transformation can be successful without digital trust. Trust is fundamental to value creation and business growth in our digital world. When trust is present, consumers and business are more likely to exchange and transact, which speeds up innovation, economic expansion, and ultimately the creation of value. In this presentation, Julia will share how ISACA is defining digital trust and how ISACA members can accelerate and champion trust within their organizations.

0950 – 1005

Break

1005 – 1100

Plenary Session: Accelerate Digital Transformation with Next Generation Remote Access Architecture aka ZTNA 2.0

Ian Lim

Field Chief Security Officer, JAPAC, Palo Alto Networks

The pandemic pushed our legacy remote access architecture to its limits. Scaling on-premise solutions became an issue. Backhauling was a performance nightmare especially for global companies. And most importantly, the security efficacy of legacy solutions cannot meet the demands of a borderless workforce that wants to access any application from anywhere – be it on-premise, cloud or SaaS. These issues are not trivial for any organization, given the fact that advanced attackers are capitalizing on the weaknesses of this legacy architecture. Remote access framework needs to be elevated to meet the threats of today as well as address the changing landscape of the new workforce. In addition to security, this architecture must also be reliable, scalable and easy to use and manage.

1100 – 1115

Break

1115 – 1210

Plenary Session: Predictive Security for Digital Transformation - Where did we go wrong?

Krishna Rajagopal

Chief Executive Officer, AKATI Security

If security products were so effective, why do we still get hacked?

This talk covers an in-depth dive into the latest cyber threats and trends amidst the current threats landscape prevalent in Malaysia. Expect a no-holds-barred discussion regarding how the increasing level of new technology adoption will offer a new means to cybercrime. A wide variety of information security topics will be addressed to provide a vital understanding of the increasingly sophisticated and advanced cyber threats, especially with the emergence of new technologies. We aim to disclose what every Top Management should know about cybersecurity and what the Cybercriminals don't want you to know. Through this thought-provoking talk for practitioners, management, and leadership roles alike, each participant will leave with a renewed sense of understanding on Cybersecurity Digital Transformation.

1210 – 1225

Break

1225 – 1320

Panel Discussion: Accelerate Digital Transformation - Is Cloud the Only Solution?

Chair: Nickson Choo, Deputy Director, Bank Negara Malaysia

Panellist:

- *Jason Yuen, Partner – Technology Consulting & CyberSecurity Leader, EY*
- *Retnendran Sivasupramaniam, Portfolio Audit Head – Technology / Digital & Data Analytics, AmBank Group*
- *Anwer Yusoff, Head of CyberSecurity Industry Engagement & Collaboration Department, CyberSecurity Malaysia*

Rapid advances in technology and the emergence of new digital solutions have accelerated the digital transformation agenda. Many organizations are starting to feel the pressure to take advantage of digital opportunities or risk losing out in competition. In this session, we will explore with our panel speakers the emerging technologies commonly adopted - answering the question “is Cloud the only solution?”, and whether digital transformation has transcended and moved beyond front office function e.g. risk, compliance and internal audit.

1320 – 1400

Virtual Booth Visit

End of Day 1

Virtual Conference Day 2: 10th August 2022

0900 – 0905

Welcome Back & Recap Message by Organizing Chairperson – Jasmine Goh

0905 – 1000

Plenary Session: Cyber Security: Where It Fits in the Digital Transformation Risk Landscape

Jo Stewart-Rattray

Director of Technology & Security Assurance, BRM Advisory

This presentation looks at where cyber security fits in the digital transformation risk landscape from a Chief Security Officer’s perspective. How you can create a security first approach at the same time as considering risks and making security an enabler of digital transformation rather than a road block.

1000 – 1015

Break

1015 – 1110

Plenary Session: Installation Vs Implementation – Accelerating the Change Program through Cultural Osmosis!

Brian Hay APM

Executive Director, Cultural Cyber Security Pty Limited

Too often we subscribe to the manta of “build it and they will come”. And in these endeavours all of the effort is put into the technical installation, integration, and digital manipulation to wonderfully “install” a new amazing and technical offering.... However, it may adopted, utilised and exploited by only 10% of the workforce, therefore never realising its full potential and never delivering the savings and benefits of which it is indeed capable. This is completely the opposite of “Installation”, where the new technology is embraced, utilised, appreciated, and immediately commences a return on its investment..... the difference “People”. Making people part of the change program and building a culture of change, continual improvement and the pursuit of excellence is a recipe for enduring success. Leave people out of it and you get installation. This session will explore the difference between Installation and Implementation but then further extend that conversation towards acceleration of the change program through Cultural Osmosis! The enablement and unlocking of the potential of the human element..... the most vital ingredient in the entire recipe, but too often forgotten! The mysterious world of the psychology of the technology!

1110 – 1125

Break

1125 – 1220

Plenary Session: Accelerate Digital Transformation Through a Security Cyber Supply Chain

Leonard Ong

Senior Director | Regional Information Security Officer, Intercontinental China, GE Healthcare

Cyber supply chain has a critical role for any organizations who are working towards accelerating their digital transformation. One key critical component of the cyber supply chain is software. The threats arising from the compromised approved applications has created notable cyber events impacting enterprises of different scales. With the threat being seen increasingly more frequently and damaging in recent times, we have to step up our game in understanding the threat, assessing our existing strategies & control, and finally adjusting our processes and controls. This presentation will discuss the importance of cyber supply chain, the recent cyber events along the chain and what we can do to step-up and be resilient.

1220 – 1235

Break

1235 – 1330

Plenary Session: To Be Announced

To be announced

To be announced. Find out on the latest details in the CIAG2022 site: www.isaca.org.my

1330 – 1400

Virtual Booth Visit

End of Day 2

Virtual Conference Day 3: 11th August 2022

0900 – 0910

Welcome Back & Recap Message by Organizing Chairperson – Jasmine Goh

0910 – 1025

Technical Masterclass: The Digital Bang for OT – Consequence Driven, Cyber-informed Engineering (CCE)

Jaco Benadie
Partner
Ernst & Young Consulting Sdn Bhd

Will discuss topic in relation to the digital transformation for Operational Technology and the Consequence Driven, Cyber-informed Engineering (CCE) - which is aim to reduce the impact of an advanced, targeted cyber sabotage campaign on an organization's most critical operations in the evolving digital landscape.

Management Masterclass: To be announced

Michel Feijen
Managing Director APAC & MEI
MetricStream

1025 – 1040

Break

1040 – 1155

Technical Masterclass: Are You Leaving Data to Chance? Data Governance at the Core of An Organization's Digital Transformation Journey

Ong Khai Chiat
Partner & Data and Analytics Leader
PwC Malaysia

Ronald Chung
Partner, Risk Assurance Data Trust Services
PwC Singapore

Data should be at the core of any organization's digital transformation journey and is arguably an organization's most important asset. Data fuels growth yet still possesses its own risks, resulting in an organization's make-or-break situation. Why leave data to chance? Embedding good data governance at the core of an organization's digital transformation journey ensures that data is usable, accessible, protected, and supports better analytics to improve decision making and outcomes. Through this session, participants will be able to gain a deeper appreciation of what, who, why, and how in forming a sound data governance framework with effective data management practices and get tips for aligning data governance with digital and business strategy to achieve your organization's purpose.

Management Masterclass: Managing COVID-19 and Global Supply Chain Crises: Re-align Your Business Continuity and Crisis Management Programs toward Operational Resilience

Dr Goh Moh Heng
President, BCM Institute
Managing Director, GMH Continuity Architects

- Learn and adapt lessons from COVID-19 and the global supply chain crisis
- Review and rethink existing business continuity and crisis management protocols
- Integrate and upgrade communication, technology, policy, and compliance requirements
- Emphasize the commitment of the leadership
- Start re-aligning and working holistically toward operational resilience and not recovery

1155 – 1210

Break

1210 – 1325

Panel Discussion: Accelerate Digital Transformation - How to Strike a Balance Between Innovation, Risk and Security in a Digital Driven Organization

Chair: Clarence Chan, Partner – Digital Trust & CyberSecurity, PricewaterhouseCoopers Risk Services Sdn Bhd
Panellist:

- *Dato' Ts. Dr. Haji Amirudin Bin Abdul Wahab, Chief Executive Officer, CyberSecurity Malaysia*
- *Boey Yan Yee, Director of Technology, SterlingCheck APAC*
- *Faisal Yahya, Country Manager, Vantage Point, Indonesia*

As organizations accelerate their investment in new technologies, along with this comes rising concerns - security, privacy and ethics are just amongst the few. In this session, the panel speakers will share with us how successful organizations are managing the "risk-reward equation" carefully as the adoption of emerging technologies takes place and how risk managers play an important role.

1325 – 1400
